

Recommended specifications for concrete slab:

- 1.) Elevate concrete pad to existing soil grade.
- 2.) Pad slope not to exceed a half percent.
- 3.) 4"-6" stone pre base.
- 4.) Overall concrete pad dimensions per TurfHound schematic dimensions.
- 5.) Pour 4" standard 3,000 psi concrete slab; fiber fill optional.
- 6.) Square and clean outside edges for finish, do not round edge; it will interfere with the frame.
- 7.) Standard light broom for finish surface.
- 8.) Expansion cuts optional per your region.

NOTE:

If you decide to install pavers do NOT install until after the tee line has been installed and screwed down.
