

Golf Course Update

Dear Fellow Members,

When the club renovated the range complex, the decision was made to install the TurfHound teeing surface so the range could be used during inclement weather and the early spring/late fall seasons when the grass, range tee has difficulty recovering from usage due to cold soil and air temperatures. The availability of the TurfHound tee allows the grass, range tee to recover and gives golfers the continued use of the range facilities.

The value of the TurfHound tee has increased since the club's calendar extended an extra two weeks starting last year. Just like the previous couple of seasons, the availability of the grass, range tee will be limited for the remainder of the golf season.

Thank you,

The Green Committee
