Posted on July 8, 2020

Stone Harbor Golf Club, one of the Jersey Shore's most highly regarded private golf clubs, announces the debut of a renovated driving range and putting green for its members beginning July 3, 2020. Over the past five years, the club's dedicated owner Lee Fishman and its innovative leadership team have launched extensive golf course and clubhouse enhancement projects to provide members with an unrivaled private club experience at the Shore.

Stone Harbor Golf Club retained renowned Golf Course Architect Tyler Rae to design and supervise the construction of the practice area renovation. Members will now be able to sharpen their golf skills on a beautiful and expansive 38,000 Sq. Ft. teeing area offering five enhanced target greens. Also, the club installed a state-of-the-art **TurfHound** tee surface system that is designed to mimic the feel and performance of natural turf. **TurfHound** may also be found at other prestigious courses, including Pebble Beach, Baltusrol, and Merion.
