

Recommended specifications for concrete slab:

- 1.) Top surface of concrete base pad should match elevation of existing grade.
- 2.) Pad slope not to exceed a half percent.
- 3.) Overall concrete pad dimensions per TurfHound schematic dimensions.
- 4.) Pour 4" standard 3,000 psi concrete slab; fiber fill optional.
- 5.) Square and clean outside edges for finish, do not side wall; it will interfere with the frame.
- 6.) Standard light broom for finish surface.
- 7.) Expansion cuts optional per your region.

NOTE:

If you decide to install pavers **DO NOT** install until after the tee line has been installed and screwed down.
